EnterpriseOne users on any platform can now breathe easy.

Encrypting sensitive data in EnterpriseOne, regardless of platform, has been a complicated & lengthy process. Crypto Mondo uses innovative and proven technology to bring automation to encrypting your sensitive data with:

- Linoma's Crypto Complete for the iSeries , or
- Protegrity's Defiance Data Protection System (DPS) for Oracle and Microsoft SQL Server

Protect Your Sensitive Data

- Rotation of encryption keys without having to re-encrypt existing data
- Social security numbers, account information, credit Card numbers
- Compliance with Advanced Encryption & Data Encryption Standards

COMPLIANCE STANDARDS

- Payment Card Industry (PCI) Standards
- GLBA
- Sarbanes Oxley
- State Privacy Laws (CA SB 1386)
- PIPEDA
- HIPAA
- European Privacy Directive
